Venkateswara College of Education is one of our many colleges which strive to produce noble citizens. This college has produced teachers of excellent quality. It is our mission and vision to educate and train the student teachers who belong to the down-trodden society, equal to that of city training centers and Venkateswara College of Education serves this purpose.

I am happy indeed that Venkateswara College of Education, has produced a magazine this academic year also. "Our task, regarding creativity, is to help children climb their own mountains, as high as possible. No one can do more." —Loris Malaguzzi

I wish that this magazine may bring the essential change to produce a better society encouraging students to be highly creative and develop in them a scientific spirit.

1

Shree M. DHANASEKARAN Chairman and Managing Director, SMVET

Venkateswara College of Education has put in its best effort to produce magazine this academic year also. This is a college which produces teachers who sculpture the society by chiseling the young minds. The innovative and creative work of future teachers would encourage the forth coming student teachers The magazine reveals the hard work of the principal, faculty and the students.

"Books are the means by which we build bridges between cultures."

Dr. Radhakrisnan

I wish that this e- magazine would serve its purpose in the best way.

Shree V.SUGUMARAN Vice - Chairman SMVET

"A life of joy and happiness is possible only on the basis of knowledge and science." . Dr. Radhakríshnan.

Venkateswara College of Education is our college that was started in the year 2005 by the founder philanthropist Shree Kesavan. He had belief in the words that the destiny of a nation is shaped in the classrooms. His belief took the shape of the College of Education.

VCE has trained teachers who belonged to the rural area and has made them compete with that of those colleges in the city. The trained teachers are placed in renowned schools and also in Government Schools. One cannot deny the fact that the team of workers who have served earlier and those who still serve are efficient and proficient. I am happy that VCE has produced a magazine this year also.

I wish this magazine would help students to enhance their professional capacity and help in rendering their best service to the society.

> Dr. K. NARAYANASAMY Secretary SMVET

Venkateswara College of Education. It was started in the year 2005 with the aim of

imparting the required quality education and train students to be excellent teachers who could produce good citizens, and thereby an egalitarian society. The college has served its purpose in the long run.

Many of the trained teachers have been placed in the government sectors and others in renowned educational institutions. Needless to say it's the hard work of all the Principals and the teacher–educators who have served and who are still on service.

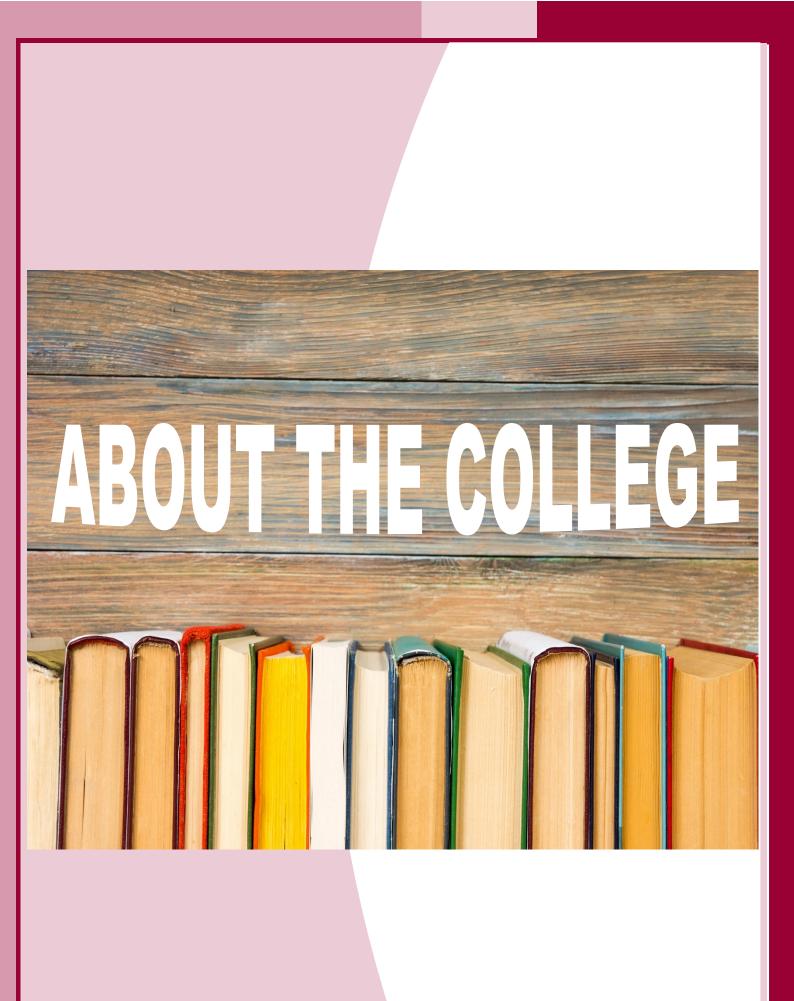

And this magazine is the best example of the toil of all the staff and students of this college. I would like to quote Dr. Radhakrishnan,

"The end product of Education should be a free creative man, who could battle against historical circumstances and adversities of nature"

> I am happy that VCE has produced a magazine this year also. BEST WISHES!

> > Shree DATCHNAMOORTHY

COLLEGE MAGAZINE 2022

ABOUT THE COLLEGE

Sri Manakula Vinayaga Educational Trust established Venkateswara College of Education to impart quality education to the teacher trainees who are the backbone of our country. A wide range of career opportunities are available today to the teaching community and this is sought to be facilitated by our Trust. Venkateswara College of Education, a self financing institution was established in the year 2005 by obtaining due permission from the Government of Puducherry, recognized by the National Council for Teacher Education, Southern Regional Committee , Bangalore and affiliated to the Pondicherry University, Puducherry.

Vision

To bring about in renaissance much required for true education i.e. integration of mind, body and soul.

Mission

Teaching and Learning are dynamic, interactive life-long process. Hence our Mission is to prepare teachers who will be executive leaders and passionate life-long learners and assume top position. Formerly Teacher Education centered on teaching, but now, the scenario has changed from teacher- centered to child –centered Education and there is a shift from "Teaching" to "Learning". Our educational objectives are based on this perspective and are set to bring about the overall personality development of our student teachers.

COLLEGE MAGAZINE 2022

Objectives:

- ⇒ Motivate the children to learn
- ⇒ Understand and practice various methods of teaching to facilitate learning
- ⇒ Organize different ways of learning
- ⇒ Create proper classroom climate which is conducive to learning
- ⇒ Select and use appropriate technological aids for learning
- ⇒ Handle multi grade situations to promote learning
- ⇒ Effectively use assessment of achievements

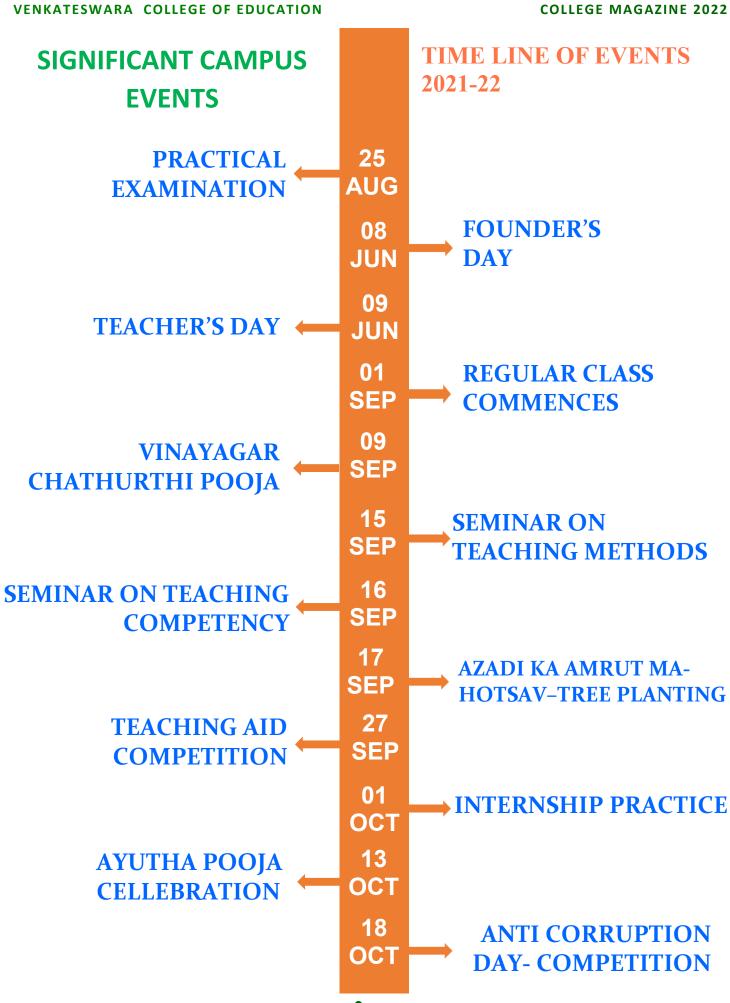

Infrastructure

- \Rightarrow Spacious Classrooms and seminar halls with proper ventilation.
- ⇒ Well-equipped laboratories for Physical science, Biological science and Psychology.
- \Rightarrow An automated library, well furnished providing reading and borrowing facility.
- \Rightarrow Caring, supportive and nurturing campus environment.
- ⇒ Canteen on campus
- \Rightarrow ICT lab and language lab providing individual learning facility.
- \Rightarrow Well experienced and qualified faculty members.

STUDENT-TEACHERS' CREATIVITY

THE RIGHT EDUCATION

Education is the way to successful life. Each one should gain education through suitable way. For the acquisition of education by students, the teachers have a very great role to play. Education is everything in life. Through the achievement of education a person become conscious about his/her environment, responsibility towards the society, rich with knowledge and wisdom, get matured, knows how to react towards others, how to solve the problems in life etc. Education has infinite benefits .These benefits can be reached by providing a good environment by teachers.

The primary aim of education is to make an individual a good person with good mental health. But nowadays the opposite occurs. Most of the schools, colleges and other institutions give importance only for the academic work. Teachers force the students to give high score in the subjects. For it teachers impose huge work on the students without considering their mental situations. Each and every student is different in his skill, capability and interest. So every individual has a shining field. But the teachers give priority only for the top scorers. They do not consider arts, sports like activities. Therefore the mental conditions of the students get ruined. We can see so many suicide cases in many institutions. The system which give importance only on knowledge acquisition prevent the growth of a mental health and good personality. Several times the achievement of education shrink only into textbook and give results on the certificates on the course. This leads to decrease in the power to solve life's problems and the qualities of the individual. This education system which is full of mistakes is completely wrong.

For the better life of students the education system should move along the right way. The teachers have inculcate good qualities in children by giving priority to the extracurricular activities. Teachers should give importance to co-curricular and activities as well.

Therefore a good educational system can produce excellent citizens of the country. Education is not for obtaining degrees. It is for leading a happy

and healthy, problem free life. As teachers lets work for providing good education to the society.

MATH FACTS!

2520 is the number divisible by 1-9 natural numbers.

Every odd number has spelling with "e" in u.

-40°C is equal to -40°F

6 Weeks= 10! Seconds

The opposite sides of dice always add up to 7.

Among all the shape with the same perimeter, circle has the largest area.

Abacus is considered as the origin of calculator.

1729 is the smallest number expressible as a sum of two cubes in two different ways. That is $1729=1^3+12^3=9^3+10^3$. This number is now called the Hardy-Ramanujan number.

A "jiffy" is an actual unit of time. It means 1|1000 th of a second.

SHINE WITH EUCATION

Use your brain Education is main Live not in vain You can get nothing without pain No pain no gain To educate, do not restrain To educate, do not restrain It's only training your brain. To think and think And learn of the ways That makes you shine always

IMPORTANCE OF EDUCATION

EDUCATION

Education is a powerful weapon that aid an individual to face life and overcome the social problems like poverty, fear, etc and to achieve success.

EDUCATION IN INDIA

The process of learning, training, and teaching human capital in schools and universities is education. The Indian government reflects specific economic policies that shows the importance of education in India.

REDUCING OF UNEMPLOYEMENT

Illiteracy hinders the progress of a nation leading to low standards of living and an increased crime rate.

REMOVES POVERTY

Education is the key and most effective tool to remove poverty in India. Education helps people to learn certain skills and gain knowledge which eventually makes them capable to learn a living for themselves. Children who received quality education are empowered, aware and qualified.

CAN EDUCATION ERADICATE CASTEISM

No, Education only reduces the effect of the problem but can't eradicate it entirely. But education helps to remove certain hurdles in the path of eliminating caste hierarchy, providing adequate information and awareness about social justice, developing political will, and Dalit leadership.

EDUCATION IN ECONOMIC STABILITY

Education provides a foundation for development, the groundwork on which much of our economic and social well-being is built, increasing the values and efficiency of their labor. It helps to uplift the poor from poverty.

P. PRITHIGA I-B.Ed (English)

COLLEGE MAGAZINE 2022

V.RAJESWARI

I-B.Ed (English)

Right to education Is a fundamental right Without education How can we live? Education brings development physically and morally. Illiteracy is a moral death, Bring illiterate is like a ship, Without the caption and the crew As soul is to the body Education is to life Without education we need Like animals our lives we leed To reach the height of humanity Educate, Educate for better Society.

EDUCATION

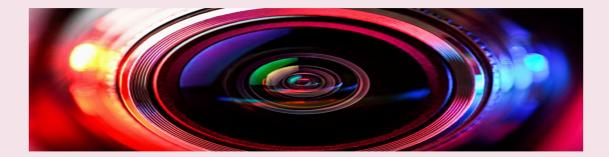

Education is a power to learn new things in life. It's a ladder for better future of our life. Education is a seed you sow, And success is the sweet fruit you get. Knowledge is like a weapon. You can use it to defend And to strike off the evil practices Once received it can never be taken away from you. Remember; information is received through books, But education is received from learning experiences.

Children are the future pillars of our nation, So educate every child, without exemption.

K.JEEVITHA I-B.Ed (Physical Science)

The Best Brand Camera-Education

Education is the best brand camera Just use it to focus on what's important. Make clear of your future, Develop good things from your picture, When it is concentrated it glows And enters deep inside your heart. It's for us to create Beautiful memories in our soul. Education is like a camera, Just a picture is worth A thousand words and it never lies. Look through the lens of knowledge Which isn't photo shopped with filters, It shows the picture of your gain; Only the educator knows how to bring The beauty of his blossom subject By focusing, if things don't work, Just by taking another shot!!!

L.KOWSALAYA II-B.Ed (Physical Science)

EDUCATION AND ITS IMPORTANCE

ANNANAIYA ANIL I-B.Ed (Mathematics)

"Education is the best friend. An educated person is respected everywhere. Education beats te beauty and the youth. - "

Education has made man rational and civilized. The personality of an individual is unveiled in all its aspects- physical, intellectual, social, emotional, moral, spiritual and aesthetic. Education makes a person intelligent, learned, skillful, courageous and virtuous. It transforms him/her from instinctual animal to social and rational animal. It is only through education that moral ideals, spiritual values aspirations of nation, culture heritage and contents are transferred from one generation to another.

Meaning of Education:

The word education is derived from a number of etymological roots EDUCARE EDUCERE EDUCATUM

EDUCARE:

The Latin word 'educare', means to 'bring up' or 'to nourish'. It means that the child is to brought up keeping in view certain aims and ideals.

EDUCERE

The Latin word 'educere' means to lead out', to bring forth' or 'to draw out'. In simple words, it means that the function of education is to lead out, or to draw out of the best in child and man, instead of 'to put in'.

EDUCATUM:

The Latin word 'educatum' implies 'the act of teaching' or 'training' or instruction'. E + DUCO:

'E' means 'out of' and 'duco' means 'to lead' viz., making internal the external. Thus, the etymological root conveys certain important meanings. The words 'educatum' and 'educare' convey the notion that education is something external which is damped from outside.

Importance of Education:

Progressive Development of Innate Powers:

According to psychologists, every individual is a potential child who is endowed with some innate tendencies or capacities which should be unfolded by education in a number of ways and means. Hence, the Swiss psychologist has remarked, "Education is a natural, harmonious and progressive development of man's innate powers".

All-Round Development of Personality:

All-round development of personality like physical, emotional, spiritual, mental, social, moral, and aesthetic aspects of human personality in a equilibrium.

Education helps in the in the development of every aspect of personality in a harmonious manner by providing appropriate opportunities and stimulating environment.

Character Building and Moral Development:

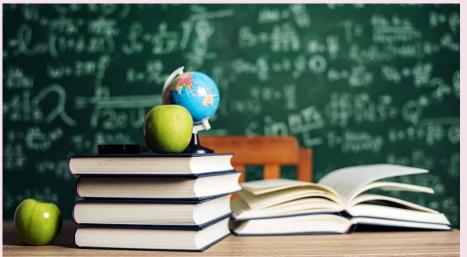

Another important function of education is to develop moral qualities in the individual and build a person's character. By education, the child learns what is good and what is bad.

Building of Good Citizenship:

The good citizen is the asset of a nation. In order to be a good citizen certain qualities like sense of responsibility, service, sacrificing one's interest, loyalty to the nation, performing duties punctually and sincerely, a sense to understand the functions of a democratic system, social & economic system, and qualities of leadership are necessary. Education paves the for this.

CONCLUSION

Every child must be given the opportunity to get the right education. No one should be denied education. Victor Hugo has rightly said that he who opens a school door, closes a prison.. According to Gilbert K. Chesterton, education is simply the soul of a society as it passes from one generation to another. So lets educate our children to them powerful and thereby making the nation strong and the globe a happy, prosperous and peaceful place to live in.

EDUCATION

J. RAMYA I-B.Ed (English)

INTRODUCTION

Education is the process of facilitating learning or the acquisition of knowledge, skills, values, morals, beliefs, habits and personal development. Education originated as transmission of cultural heritage from one generation to the next. Today, education goals increasingly encompass new ideas such as liberation of learners, critical thinking about presented information skills needed for the modern society, empathy and complex vocational skills.

The word 'education' is derived from the Latin word educatio which means a breeding, a bringing up, a rearing and from educo (I educate, I train). Educational methods include teaching, training, storytelling, discussion called pedagogy. Education is supported by a variety of different philosophies, theories and empirical research agendas. There are movement for education reforms, such as for improving quality and efficiency of education towards relevance in student's lives and efficient problem solving in modern or future society at large, or for evidence based education methodologies. A right to education has been recognized by some government and the united nations. Gobal initiatives aim at achieving the sustainable development goal, which promotes quality education for all.

HISTORY OF EDUCATION

Education began in pre history, has adults trained the young in the knowledge and skills deemed necessary in their society. In pre literate societies, this was achieved orally and through imitation, story telling passed knowledge, values and skills from one generation to the next. As cultures behind to extend the knowledge beyond skills that could be readily learned through imitation, formal education developed.

School existed in Egypt at the time of middle kingdom. Plato founded the academy in Athens, the first institution of higher learning in Europe. The city of Alexandria in Egypt, established in 330 BCE, became the successor to Athens as the intellectual cradle of Ancient Greece. There are great library Alexandria was built in the 3rd century BCE. European civilizations suffered a collapse of literary and organization following the fall of Rome in CE 476.

WHAT IS SCHOOL?

The word school is drived from Greek 'Schole' originally meaning "leisure" and also "that in which leisure is employed" but later " a group to whom lectures were given was regarded as school."

A school is an educational institution designed to provide learning spaces and learning environments for the teaching of the students under the direction of the teachers. Most countries have system of formal education, which is sometimes compulsory. In these systems, students progress through a series of school .A 'critics of school' often accuse the school system of failing to adequately prepare students for their future lives, of encouraging certain temperaments while inhibiting others, of prescribing students exactly what to do, how, when, where and with whom , which would suppress creativity and of using extrinsic measures such as grades and homework, which would inhibit children's natural curiosity and desire to learn.

In homeschooling and distance education, teaching and learning take place independently from the institution or in a virtual school outside a traditional school building, respectively. Schools are organized in several different organizational models including departmental, small learning communities, academic, integrated and schools within schools.

TYPES OF SCHOOL

There are different types of schools like,

Government schools Government sponsored school Government Aided school Private school Religious school

CONCLUSION

Government and private schools have their own significant role promoting education, but there is no doubt private schools are better than government ones. There is a moderate strength body of evidence showing that attending private schools tends to be more expensive for users than attending state school in terms of school fees and meeting the more hidden costs of uniforms and books. Today with the introduction of

COLLEGE MAGAZINE 2022

THE WONDER OF READING

A. ASWATHI I-B.Ed (English)

"One best book equal to hundred good friends. One good friend is equal to a library."

Reading for me has always been a medium of escape to a new world, as books have the ability to disintegrate the shackles of time and space. Just one sitting and reading make suddenly an enter to a new world. We often find ourselves glancing into lives of people who we have never met before. Who might have been dead for thousand of years, yet they reach out to us, these silly white and yellow pages with an inexplicable magic. George R.R words been more true, "I have lived a thousand lives and I've loved a thousand loves. I've walked on distant world as seen the end of time, because I read."

The importance of a reading habit is linked to professional success, as it open up the mind to new experiences and provides a new avenues of knowledge. According to American author Ernest Homingway "There is no friend as loyal as a book".

So the books fire up your imagination, provide information and open up your world.

Reading makes a man wise and we get pleasure from it. As we say the knowledge is the power, the reading is the only way to gain the knowledge. It is to be dying. As technologies so developed E-reading improved. It is the reading by using electronic media. In the olden days brain can accumulated with the a vast kind of knowledge. But the new generation keeps the knowledge always in his pocket in the form of mobile phone or tablets. We can search it when we want no need of memorize or read. There is no need to sitting in library and search for information through reading.

The person who get happiness and solace to his mind from reading. The thirst of reading gives many friends in the form of various characters in a book. From a young age, children learn that reading is the foundation of their future education and better life.

If you are interested to read.... read every drop of information. Try to accumulate knowledge up to the last drop of life.

Good books you read for peaceful life to lead It's a great deed and today's need.

COLLEGE MAGAZINE 2022

THE VALUE OF EDUCATION

Education has a value That no one can de-value It is the defense of the nation And every body's salvation Education is not information Its life's priceless experience. Its not only being Scholars, And coming out with flying colors As great many achievers.

Education is understanding of self, It gives us job, joy, peace and happiness It gives us everything we need

M. AARTHEESWARI I-B.Ed (English)

EDUCATION

Education is not just a word It's a tool that changes our world, And brings us to light from the dark; Knowledge is not a search of pride It's looking for pride in what you have received, And accompanies you beyond eternity; Learning is not just looking through a window It's not watching everything but Staring at things that make us happy; Keep your eyes wide open and observe The education for life, you preserve.

J. ARTHI I-B.Ed (Mathematics)

EDUCATION IN THE REAL SENSE

Education is a process of moulding a child in to a responsible adult. The term education is the main way of the process of social reformation for the dynamic nature of the society. Education is the process of facilitating learning, or the acquisition of knowledge, skills, values, moral, benefits, habits and personal development. Education originated as transmission of cultural heritage from one generation to the next. Today, educational goals increasingly encompass new ideas such as liberation of learners, critical thinking about presented information, skills needed for the modern society, empathy and complex vocational skills.

Education began in the prehistory, as adults trained the young in the knowledge and skills deemed necessary in their society. In preliterate societies, this was achieved orally and through imitation. Storytelling passed knowledge, values, and skills from one generation to the next. As cultures began to extend their knowledge beyond skills that could be readily learned though imitation, formal education developed. Schools existed in at the time of Middle kingdom.

Education encompasses teaching and learning specific skills, and also something less tangible but more profound: the imparting of knowledge, positive judgment and well-developed wisdom. Education has as on of its fundamental of culture from generation to generation (see socialization), yet it more refers to the formal process of teaching and learning found in the school environment.

Education means "to draw out," facilitating the realization of self-potential and talents of an individual. It is an application of pedagogy, a body of theoretical and applied research relating to teaching and learning and draw on many disciplines such as psychology, computer science, linguistic, neuroscience, sociology and anthropology.

Education started as the natural response of early civilization to the struggle of surviving and thriving as a culture. Adults trained the young of their society in the knowledge and skills they would need to master and eventually pass on. The evaluation of culture, and human being as a species depended on this practice of transmitting knowledge. In pre- literate societies this was achieved orally.

Perhaps the most significant influence on the western schooling system was Ancient Greece. Such thinkers as Socrates, Aristotle and Plato along with many others, introduced ideas such as rational thought, scientist inquiry, humanist and naturalist.

TRY YOUR BEST

If you always try your best To overcome all life's test Then you'll never have to wonder All life's storm and thunder, Try to be your best Let your 'good' be 'better' And 'better; be the 'best' We cannot be always right But we have the future bright If you can't achieve now Think of all the why's and how's

Tomorrow will be better And the day after, the best But try ,try and try To be at your best.

S. ABENAYA I-B.Ed (English)

SPECIAL TEACHERS

Teachers teach us English Maths, Science, History and Geography Which are the subject of the school, Special teachers are so cool Of mother and Goddess they play the role They smile and nod and never Hesitate to correct our mistake. They touch our heart and touch our soul With the mystical and magical wand, Of tender care and stern role. And with their help, we can land Safely and quickly in the highest place The top-most position ,which one can't reach, And when we consider this in our mind The face of the special teacher, who has been so kind,

Flashes often telling us That we should also be

Inspiring special teachers!

EDUCATION TO GIRLS, PARENTS, AND TEACHERS FOR THE EM-

K. SAHLA SALAM

I-B.Ed (English)

"If you educate a man, you educate an individual. But if you educate a woman, you educate a family and the nation at large"

Education is a form of learning in which the knowledge, skills, and habits of a group of people are transferred from one generation to the next through teaching, training, research, or self-learning. There are many discussions about the importance of education to an individual for a better society, Article 45 of the constitution has made a provision for compulsory education for all children up to the age of fourteen years within ten years of promulgation of the constitution. The focused on the importance of education based on sexes gave more importance to the education of girls because of the discrimination and hierarchy followed in a patriarchal society.

Providing equal opportunities to both boys and girls are necessary to avoid unequal treatment of a particular sex. Feminism also emphasizes giving equal treatment and providing equal opportunities for both sexes. For many years our curriculum included the subject, of gender studies and we conduct many seminars, conferences, and symposiums for the empowerment of women. There is no doubt it is the best way to erase the existing gender notion and inequality towards women. But the fun fact is that it never comes out to the practical life.

In many societies, they consider that girl should be a protected one, even though they have a high literary rate. Here comes the importance of education to both parents and teachers along with girls for the empowerment of women in society.

The family is the first teacher of all children, but it is the first place to the beginning of sex stereotypes. They consider both sexes are different, so they provide different toys, different colors of clothes, different opportunities, and educational qualifications based on the sex of their child. Here they see a girl child always to be protected one. They cannot walk anywhere without their brothers.

COLLEGE MAGAZINE 2022

Like Manusmriti said about women, her father protects her in childhood, her husband protects her in youth and her sons protect her in old age, a woman is never fit for independence. It creates a consciousness that both sexes are different and there is a hierarchy that exists, in which women are dependent on men. So these children come to the society or social institution and treat their girl fellows in a subordinate manner as through women always need their help. So the family itself protects their girl child outside the home and is forced to teach the already developed feminine character without any voice of their own.

Considering teachers, many teachers are excellent to teach gender studies or any other subjects. But the problem is that they give examples of women in their culture or society. Women should be like this or like that. They never raise their voice in house and school, never tell their opinion for decision making and never allow mingling with boys. They never try to change the patriarchal concept of feminity, but tell to follow these notions to become an ideal woman.

By following the matha, pitha, and guru's words, girls themselves believe that they always be subordinated groups or, they cannot do anything independently. So they always become caged birds wearing the mask of patriarchy. It is the twenty-first century and it is time to educate both teachers and parents. Education is the main process of reformation to both our ideas and culture. Society gradually changes from a patriarchal to a more liberal one and our children are going to face a new era. How long are we going to protect them?

So parents and teachers have to guide them and support them for their holistic development. Everyone should consider them as an individual, not by a particular sex. Provide the best education and awareness of what the issues they are going to face in a society, how to handle a situation. Give both girls and boys sex education. Give importance to their education than marriage and provide opportunities to become financially independent. Teach them method of selfdefense like, Kung Fu, karate along with their academics. Tell them the educational opportunities all around the world and promote them to go there like boys. Tell them to enjoy the world and there are different cultures to know. Tell them to travel alone, because most of the time we will be alone.

COLLEGE MAGAZINE 2022

Education through society and social institutions is also important for a girl. Educate them, not only to become financially independent but for living and for surviving. So, both theoretical parts of academics and experiences should be provided by the teachers and parents. So the education of teachers and parents is the base of women's empowerment. They are the builders of the character of a child.

Provide them proper awareness as to how to treat both sexes equally and how to develop strong and bold personalities to girls. Allow girl child to explore each field of society. Let them become a good decision-maker, Let them free from cages and let them fly high.

COLLEGE MAGAZINE 2022

கல்வியின் சிறப்பு

முன்னுரை

"கற்கை நன்றே கற்கை நன்றே பிச்சைப் புதினும் கற்கை நன்றே" என்றார் ஒளவையார். வாழ்க்கையில் எவ்வளவு வறுமை நிலை வந்தாலும் கல்வி கற்பதை மட்டும் நிறுத்தி விடக் கூடாது. தமிழர்கள் 3000 ஆண்டுகளுக்கு முன்பே ஒப்பற்ற இலக்கியங்கள் காப்பியங்களை படைக்கும் அளவிற்கு **சிறந்த கல்வியறிவு** உடையவர்களாக காணப்பட்டனர். இதற்கு அக்காலத்தில் எழுந்த புகழ்பெற்ற இலக்கியங்களான எட்டுத்தொகை, பத்துப்பாட்டு நூல்களே சாட்சியாகும்.

கல்வியின் சிறப்பு

நம் வாழ்க்கையை முன்னேற்றம் சக்தி வாய்ந்த கருவி கல்வியாகும். கல்வி நமது அறிை வயும், ஆற்றலையும் உயர்த்தி சமூகத்தில் நல்ல மதிப்பைத் தரும். கல்வி ஒழுக்கம் மற்றும் நேரத்தின் மதிப்பை நமக்கு உணர்த்துகிறது. "படிக்காமல் இருப்பதை விட பிறக்காமல் இருப்பதே மேல்" என்கிறார் பேரறிஞர் **பிளாட்டோ.** ஒரு மனிதன் கல்வியை கற்காமல் இருப்பானானால் அவனது பிறப்பிற்கே எந்த வித அர்த்தமும் இல்லை.

"கேடில் விழுச்செல்வங் கல்வி யொருவற்கு மாடல்ல மற்றை யவை."

இந்த குறள் மூலம் திருவள்ளுவர் மற்றவர்களிடம் இருக்கும் பணம், பொருள், செல்வம் காலத்தால் அழியக் கூடியவை என்றும், கல்விச் செல்வம் மட்டுமே காலத்தால் அழியாது மற்ற அனைத்து செல்வங்களும் கள்வர்களால் திருடு போகக் கூடியது. ஆனால் கல்வி செல்வத்தை மட்டுமே யாராலும் திருடவும் முடியாது என்கிறார்.

கல்வியின் அவசியம்

ஒருவன் தான் கற்ற கல்வியின் இன்பத்தை உணர்ந்தானாயின் அவன் மீண்டும் கற்பதையே விரும்புவான். இது கல்வியின் பண்பாக கருதப்படுகிறது. கல்வி என்பது வாழ்க்கையை வாழ்வதற்க்காக உதவும் கருவியாகும். அறிவியலும் சமூசமும் வாழ்க்கையை நெறிப்படுத்தவும் மேம்படுத்தவும் கல்வியை பயன்படுத்த வேண்டும். வாழ்க்கையின் நோக்கம் என்ன என்பதை இனங்கண்டு அதற்கேற்ப கற்க வேண்டும்.

"கல்வியில்லாப் பெண்கள் கலா்நிலம்" என்பாா் - பா. வேந்தா்.

கல்வி கற்றவரிடம் ஒழுக்கம், பண்பு, நோ்மை இவைகள் அனைத்தும் ஒருங்ககே அமைந்து காணப்படும். எனவே கல்வியானது ஒரு மனிதனின் முக்கிய தேவையாக இருக்கிறது.

> கல்வியை போற்றுபோம்! கல்வியால் உயர்வோம்!

COLLEGE MAGAZINE 2022

கற்றதன் பயன்

கல்வியால் நாம் அடைகின்ற பயன் நமக்கு மட்டுமே பயன்படுவதாய் இருக்கக் கூடாது. அந்த கல்வி சமூகத்துக்கும் நாட்டுக்கு பயன்படும் வகையில் நாம் சேவையாற்ற வேண்டும்.அறியாமையில் இருப்பவர்களுக்கு நாம் நமது கல்வி அறிவினால் உதவி செய்ய முடியும். நல்ல எண்ணங்களுடன் சிறந்த செயல்களையும் செய்ய வேண்டும். அதுவே கல்வியின் பயன்பாகும். இதனை திருவள்ளுவர் "கற்றவை கற்றபின் நிற்க அதற்கு தக" என்று வலியுறுத்துகிறார். கற்ற கல்வியின் படி நாம் நடப்பதே கற்ற கல்வியின் பயனாகும்.

முடிவுரை:

எம்மையும் இந்த உலகத்தையும் மாற்றி நல்வழியில் இட்டு செல்லக்கூடிய பெரும் சிறப்பு கல்விக்கு இருக்கிறது. "இந்த உலகையே மாற்றக்கூடிய ஒரு பலமான ஆயுதம் உண்டு அது தான் கல்வி". என்றார் - நெல்சன் மண்டேலா.

"படிப்பால் மட்டுமே பாரதத்தை பாராளச் செய்யலாம்" என்ற அப்துல் கலாமின் வார்த்தைகளைப் போல நாமும் கல்வியின் அவசியத்தை உணர்ந்து கற்று மேன்னை அடைவோமாக…!
